

GHANA AND THE CDF MINI COMPANIES

With the mini companies, we sponsor a WC project in Beyin, a small village at the border of the ocean in western Ghana

Our school has given 3000 euro's to the Beyin development company. With our gift they buy materials and the people of the village work for free to build the wc building

On Monday the first of June Cyprus Niisackey, our contactperson for this project is coming to our school

You can ask Cyprus about Ghana. He has a company for making tours for tourists in Ghana.

Cyprus is living with his family in Italy, so you can also ask him something about being a man from Ghana living as a migrant in Europa. He also does work as an interpreter for a migration council in Italy, so Cyprus also knows a lot about why people from Africa want to migrate to Europa.

In Autumn the “second class” starts with establishing mini-companies during the lessons of “MM” to raise money for the project in Beyin. Do you have questions about this project?
